

Universal Wall Mount Bracket **(Military grade)**

Description:

The **ibridge** Universal Antenna Mounting Systems consist of a universal bracket and choice of 2 different length mounting tube for the most demanding customer premises antenna mounting applications. The construction is better than many of these types of mounts, which are only light gauge painted steel. The ibridge Networks mounts are heavy gauge (military grade) steel, which goes thru a galvanization (plating) process and then are powder coat painted for extra protection from the elements. Fasteners used are stainless steel. The mounting tubes have 2 sets of holes to give maximum angular flexibility during installations. The mounting systems feature a universal mounting bracket with a full 90 degrees of tilt which allows for greater versatility when dealing with the variety of installation challenges found at customer sites. Their low profile and attractive styling make it ideal for installations on various styles of buildings and in all neighborhoods, including upscale neighborhoods.

Features

- **Attractive Styling**
- **Galvanized Steel (military grade) with Grey Powder Coat Paint**
- **Full 90 Degree Tilt Adjustment**
- **1.5" Heavy Duty Steel Tube for Greater Strength**
- **Extremely Versatile**
- **Supports 150Lbs. Load in both axis**
- **2 Sets of holes in tube for more angular flexibility**
- **Base accepts PAW standard U-Bolts for pole mounting.**
